MODERN AND SAFE

PLAYGROUND
FOR
YOUR
CHILDREN

About us

We are young dynamic company manufacturing complete assortment for children playgrounds. Our product range includes stainless steel playground equipment, stainless steel street furniture and safety rubber flooring - primarily rubber tiles.

We will be glad to help you create and build a safe playground. All our devices are produced in accordance with the valid safety standards. We guarantee so that fun on our playgrounds is not only funny, but also safe. All devices are compatible with safety standard EN 1176 - 1: 2008.

”
As a manufacturer we are fully aware of our responsibility, first and foremost we care about the safety of children, who are our main inspiration.
”

Why to choose SAPEKOR products?

Production process and used materials

For making our elements we use the highest quality materials and the entire production process is under strict quality control. We want our playgrounds for children were safe and funny places, where they can develop their physical and social skills.

Personal approach and technical support

We are professionals striving to meet all customer's requirements. All clients we provide with personal approach, technical support and the best possible solution.

Professional consultancy

We provide customers with advises and consultancy about choosing appropriate equipment from our product range. We are also open for new ideas and suggestions for the designing of new equipment and playgrounds.

Projecting and financing

We prepare complete project containing ground plan, 3D visualization and budget. We provide support in obtaining grants for your playground.

Safety Rubber flooring

In our product range you could find also rubber tiles, that are safety and high-quality surface for children playgrounds. We provide also installation on your playground.

Rubber tiles are designed and certified for avoiding fall injuries. Simple maintenance and long life span make rubber tiles ideal surface for playgrounds.

Transportation and assembling

We ensure all construction works of children playground. It makes you sure, that your playground meets all safety standards. We deliver goods by own cars or in cooperation with dedicated transport companies. Products would be delivered also if you decide to carry out assembling by yourself.

Service and maintenance

For all our products we provide guarantee and post-guarantee services. We strive to fix all defects as early as possible.

MATERIALS USED

CONSTRUCTION

Design of our playground equipment is made of durable stainless steel, which is not colored. As a result, it can not happen that would eventually scaled paint in future. The top layer of chromium through the supply of oxygen ensures that the surface remains unchanged.

FASTENERS

All fasteners, threaded rods of ropes and nets are made of stainless steel, so there is no possible contact with the black + stainless steel and possible corrosion.

HDPE (High Density Polyethylene)

High quality material, guarantees color stability and resistance to UV radiation.

HPL (High Pressure Laminate)

High quality material with excellent properties, **high strength**, **disposes of a high resistance to splitting, impact and scratches.**

SLIDES

Slide, which is formed from a metal plate of stainless steel and side panels made from HDPE plastic fully meets the requirements of even heavily used playgrounds.

ANCHOR

Our playground equipments are assambled into the concrete or on the the concrete slabs.

ROPE AND NETS

We use high-quality ropes with a diameter of 16 mm. Each rope consists of 6 twisted steel strands, wherein each strand is coated by polyester yarns, which is highly resistant to abrasion and color stable.

COLORS

The play units presented in the catalog, are in standard color combination. On customer request, is possible to produce the elements from other color combinations, according to the availability of the HDPE plates.

Pictograms

FALL HEIGHT

The maximum height of a play element from which it may fall. According to the fall height select an adequate impact surface.

MINIMAL SAFETY ZONE

The minimum area to which may not interfere any other play components and products for safety reasons.

AGE GROUP

The minimum age of a child that can safely play on element.

DIMENSIONS

Final dimensions of mounted play set.

ESTIMATED TIME FOR ASSEMBLY OF PLAY SETS

Specifies only time needed to assembling the pieces together.

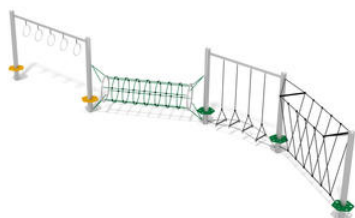

MINIMUM NUMBER OF WORKERS

Needed to assemble a play element.

A photograph of two young children looking through a window of a playhouse. The playhouse has a bright green wall and a large, orange, multi-paned window frame. The child in the foreground is wearing a blue jacket and a dark grey beanie, smiling and resting their chin on the orange frame. The child behind them is wearing a red shirt and a pink and white striped beanie, also smiling. The background outside the window shows a dark wooden fence and a brick building.

A photograph of three young children sitting on a carousel. The child in the foreground is a blonde boy in a blue jacket, looking towards the right. Behind him is a girl in a red jacket, also looking right. To the right is a girl in a blue and white striped hat and a dark blue polka-dot jacket, looking towards the camera. They are all holding onto a silver metal railing. The carousel is moving, as indicated by the blurred background showing other people sitting on a bench. The ground is a light-colored gravel or sand. The carousel's base is made of a silver metal plate with a diamond pattern. The children are sitting on yellow seats. The overall scene is bright and cheerful, capturing a moment of childhood play.
